

# How does **BONUS** impact EU:s Common Fisheries Policy and my Saturday night dinner

**Name of organisation: BONUS**

**Name of presenter: Kaisa Kononen**

Annual Joint Programming Conference

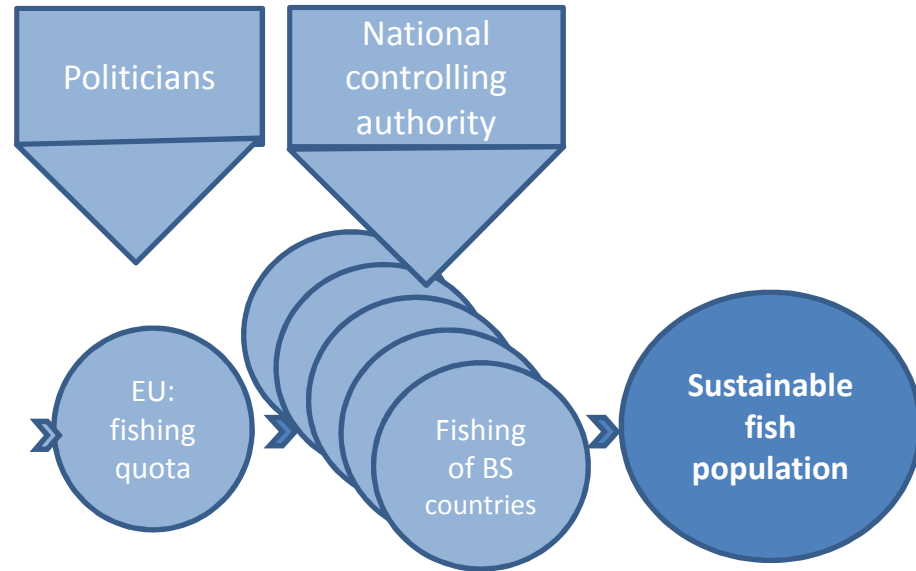

23 November 2016

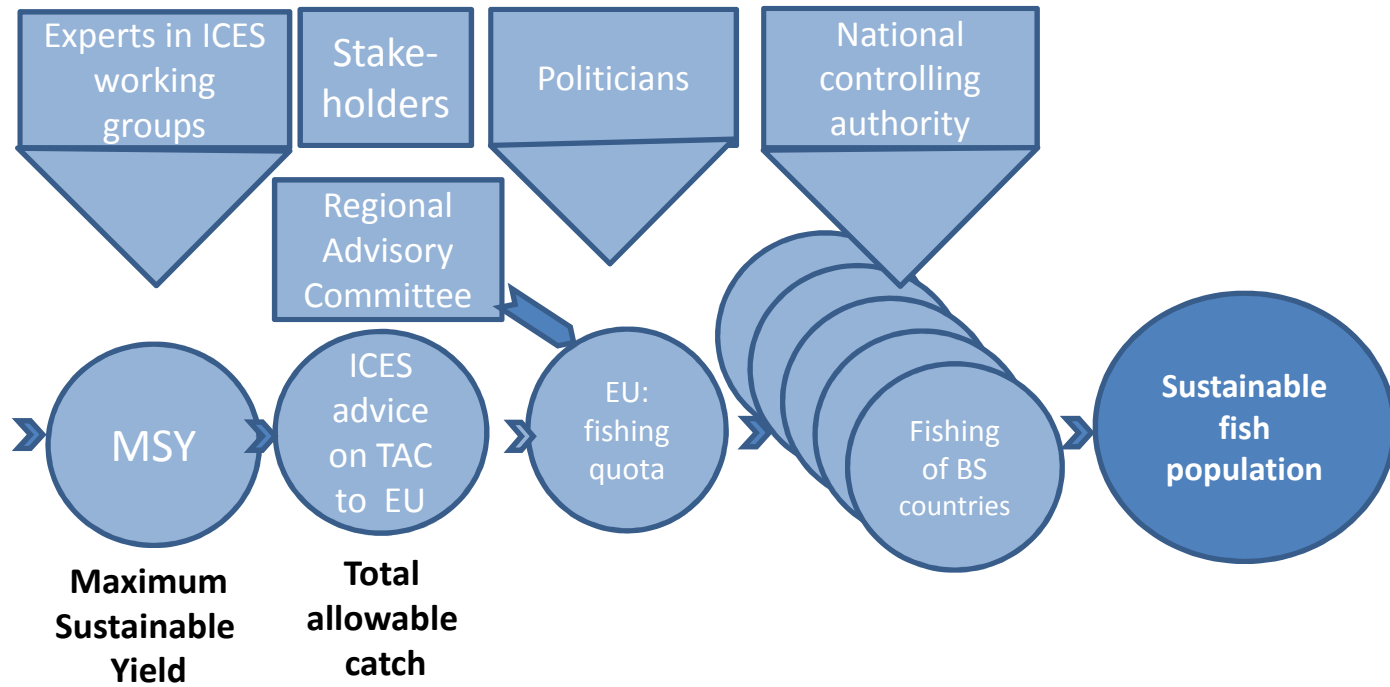

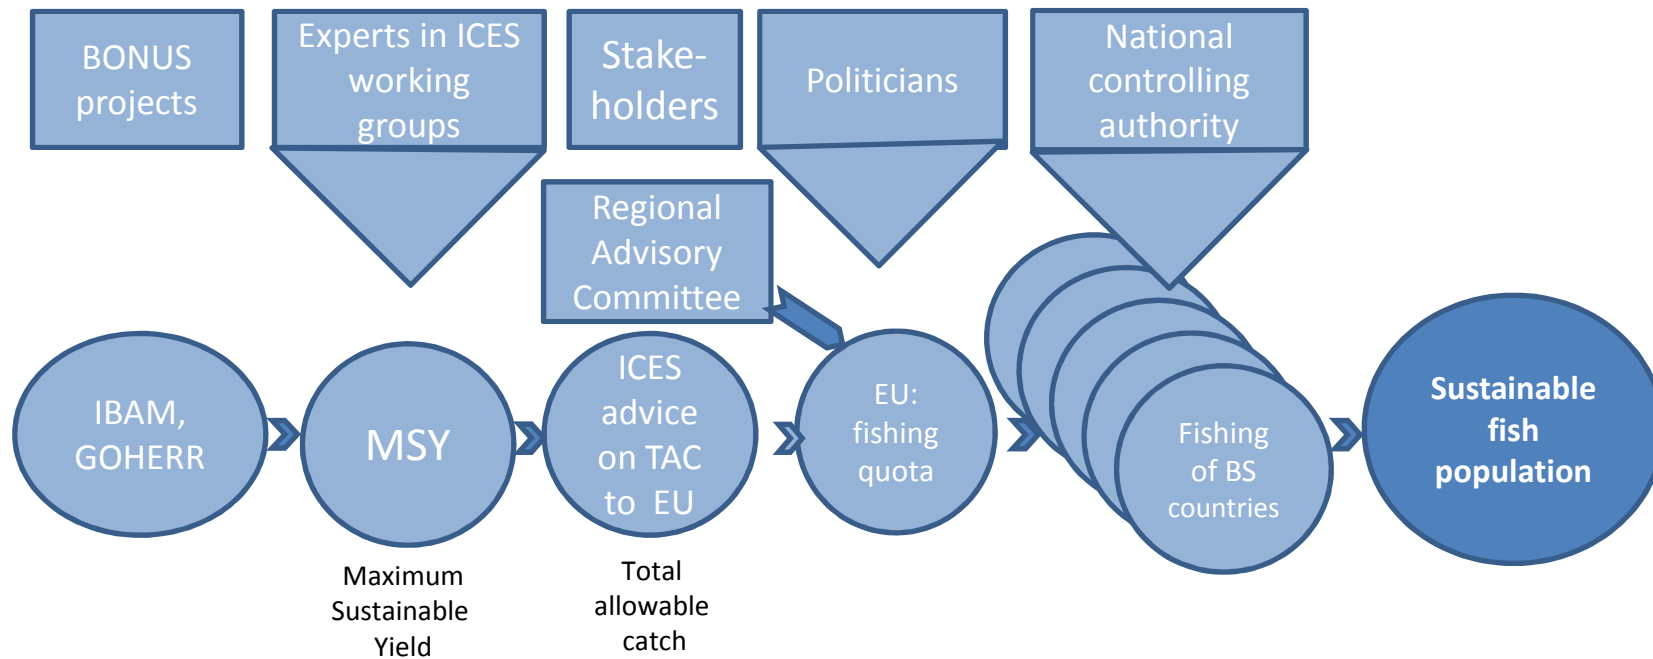

Sustainable  
fish  
population

## 22 ICES expert groups deal with Baltic Sea fisheries

- Assessment Working Group on Baltic Salmon and Trout
- Baltic Fisheries Assessment Working Group
- Baltic International Fish Survey Working Group
- ICES/HELCOM Working Group on Integrated Assessments of the Baltic Sea
- Benchmark Workshop on Baltic Stocks
- Workshop on salmon catch data in the Baltic
- Workshop on Scoping for Integrated Baltic Cod Assessment
- Workshop on Spatial Analyses for the Baltic Sea
- Study Group on Turned 90° Codend Selectivity, focusing on Baltic Cod Selectivity
- ...and others

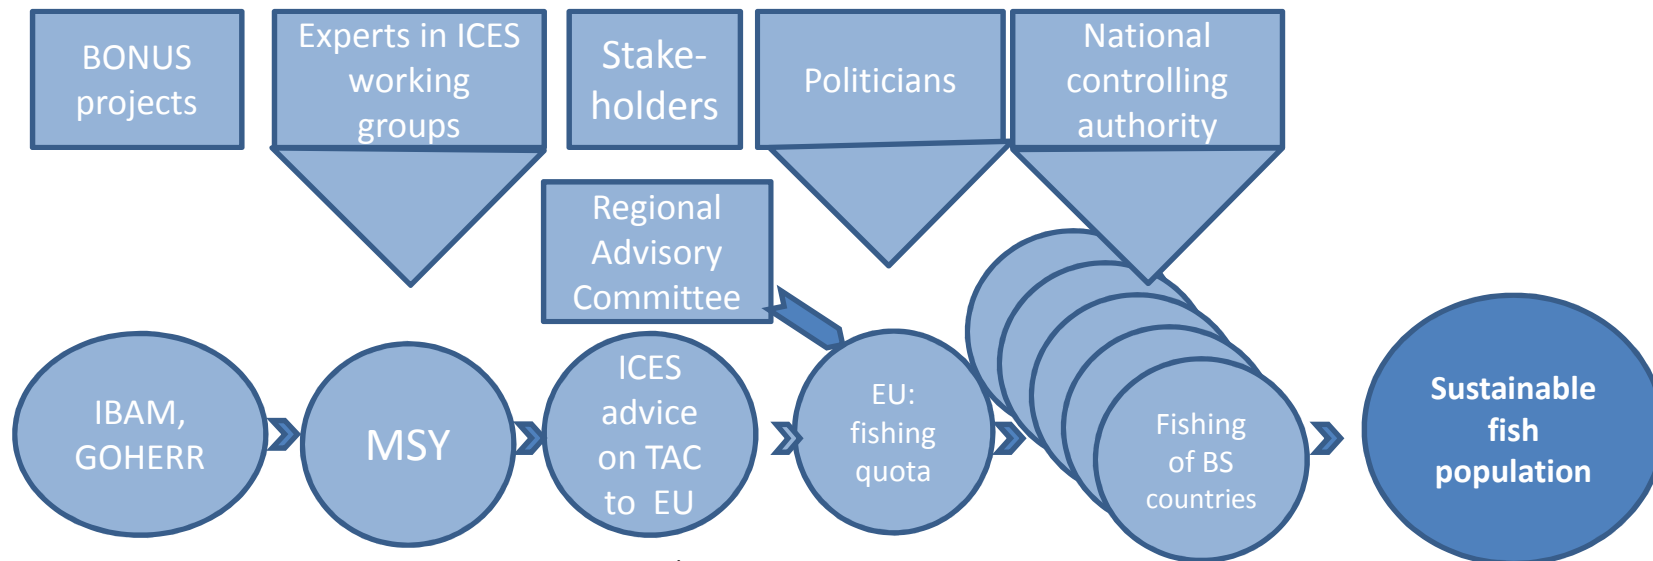

## **BONUS fisheries projects**

- **INSPIRE** improves ecosystem models for sustainable utilisation of fish resources by integrating spatial processes into the models
- **GOHERR** is developing integrated governance of Baltic herring and salmon stocks involving stakeholders

## BONUS collects data on 19 indicators

Indicator	INSPIRE 2 <sup>nd</sup> reporting	GOHERR 1 <sup>st</sup> reporting
Contributions to the development and implementation of fisheries' regulations, policies and management practices	11	1
Suggestions for designing, implementing and evaluating the efficacy of fisheries related policies and governance	3	11
Served as members in stakeholder committees, in particular EC, ICES, related to fisheries	182	1

**Marine Stewardship Council**
